Princeton

Areas of Focus

Practice

Intellectual Property

Jonathan is a registered patent attorney with significant experience in the areas of electrical, software and mechanical arts.

He has assisted clients of all sizes, from individuals and startup entrepreneurs to leading universities and industry power players, with patent preparation and prosecution matters involving computer hardware/software, wireless devices, smartphones, automated systems, semiconductors and superconductors, among other arts. Jonathan has particularly deep experience preparing and coordinating Office Action responses on behalf of domestic and international clients.
